& More!

BEFORE YOU BEGIN

Advance planning and careful layout will help ensure a successful project. Here are some items that you want to check before starting your project:

- Review the site plan to confirm lots, lines, locations and measurements
- Confirm the location of underground utilities. Call 811
- Seek all necessary building permits
- Prepare a drawing of the site
- Plan drainage to avoid erosion or buildup of water. Consider where water will drain and flow
- Be sure to use the right tools. Hand tools typically include a shovel, 4-foot level, dead-blow hammer, chisel, hand tamper, splitter and string line. Power tools may include a circular saw with a diamond blade and a plate compactor
- Always wear protective eye wear and gloves

Permeable Paver FAQs

Do I need a contractor?

We highly recommend hiring a landscape professional experienced with this type of installation.

Can I install permeable pavers with the typical gravel and sand base?

Yes and no. Yes you can do that, however the system is no longer considered permeable. The gravel bases and joint materials are required to meet required water flow rates.

Do I need a drain?

Drains are typically required. Consult your landscape professional to help you with a design for your particular project.

Helpful Hint

Level sand the easy way!

After leveling and grading the gravel base, place 3/4" PVC (which has an outside diameter of 1") in the area and spread your sand between. Drag a 2x4 over the sand using the PVC as a guide.
